

I listen every day, all day, at work and at home to K-LOVE radio 89.1 through an FM translator. This station brings me encouragement, a calm in the storm so many times at work and enjoyment. In the Ardmore area you can hear it being played in banks and retail establishments as well. Our community benefits from this station. Please do not force this vital station off the air due to low power FM. Please! We would loose a quality station with quality programming.
